

JETPen™

PROTECTING YOUR AIRCRAFT'S INTEGRITY & AESTHETIC

Touch up your aircraft with JetPen, a 2K fully reactive paint pen that delivers the same exceptional strength and crosslinked durability found in aircraft paint facilities, but with the application ease of using a pen. This new touch-up pen from Sherwin-Williams Aerospace Coatings is ideal for use on aircraft exteriors and interior cabins at any point during the application or maintenance process. Your time is valuable, and with JetPen you can save time and money to quickly and easily touch up chips, dings and scratches on your aircraft.

FEATURES:

- Once activated, multiple uses until pen dries
- Variety of colors available
- Chisel and brush tip options
- Available for epoxy primers and polyurethane topcoats and clearcoats
- Comes in a case of 24 pens
- Ideal for touch ups on aircraft exteriors and interior cabins

BENEFITS:

- Simple and convenient touch-up solution
- Inexpensive alternative to buying a full gallon of paint plus components, resulting in cost savings
- Long shelf-life (6 months for primers and 1 year for topcoats)
- Disposable design allows for inventory control

HOW TO USE:

The JetPen touch-up solution only requires three steps to use: Break it, shake it and then repaint it. No special equipment or training is required for application.

To learn how to receive a case of JetPen touch-up products in the colors you need for your aircraft, contact your local Sherwin-Williams Aerospace Coatings representative.

Sherwin-Williams Aerospace Coatings offers the technologies and expertise to support customers within the global commercial, military, general and business aviation markets. Customers value our certified products, top-rated service and knowledgeable team of field technicians that help deliver trusted aircraft coating solutions. We are committed to bringing your aircraft schemes to life by providing coating systems with the performance, color and aesthetic required to leave a lasting impression – on the ground and in the air.
