

A futuristic car body is shown from a top-down perspective, centered in a blue wind tunnel. The car's surface is highly reflective, and the surrounding air is depicted as a series of vertical blue streamlines, suggesting high-speed airflow. The overall aesthetic is sleek and high-tech.

EFFICIENCY UNLEASHED

In the fast-paced world of car refinishing, two things are crucial: increased efficiency and cost effectiveness. As energy costs continue to rise, body shops are seeking ways to reduce reliance on spray booth usage. The priming process provides an opportunity to reduce this energy drain.

The new, innovative Sherwin-Williams Ultra System P30 Prime 2K Surfacers offers an easy solution to these concerns. It eliminates the need for spray booth baking, helping to enhance process times and transform your overall workflow.

BENEFITS TO YOUR BODY SHOP:

Air-drying power

Cut drying time to just 15-20 minutes

Time mastery

Rapid drying times means more jobs are completed in less time

Boost productivity

Eliminate bake cycles, free up spray booth capacity

Built-in guide coat

Removes the need for an additional guide coat

SPEED AND PRECISION

Getting rid of the bake cycle isn't just about saving on energy costs - it's about improving your overall productivity. With air-drying, the need for a 30-minute bake cycle* becomes obsolete, freeing up the spray booth capacity. For example, if your body shop completes four jobs a day with a 30-minute bake cycle, using the Sherwin-Williams Ultra System P30 Prime 2K Surfacer instead allows your shop to tackle more vehicles within the same timeframe.

* 30-minute bake cycle used as an example for a universal surfacer.

BOOST EFFICIENCY WITH AIR-DRYING POWER

The Sherwin-Williams Ultra System P30 Prime 2K Surfacer removes the need for energy-intensive baking. With air-drying reduced to just 15-20 minutes, body shops will see a drop in energy expenses. It also helps in creating a more environmentally conscious and efficient operation.

ELEVATE THROUGHPUT, PROFITS AND COLOUR MATCHING

The faster the drying, the more jobs you can complete, and the more profits you can generate. Our surfacer reduces process times, boosts throughput, and features three grey shades for precise colour matching.

DEDICATED REDUCER AND ACTIVATOR

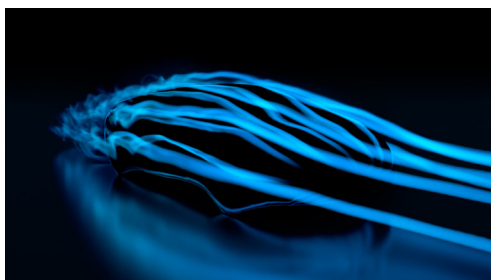

The Sherwin-Williams Ultra System P30 Prime 2K Surfacer comes with dedicated reducer and activator. For technical information refer to the product Technical Data Sheet.
