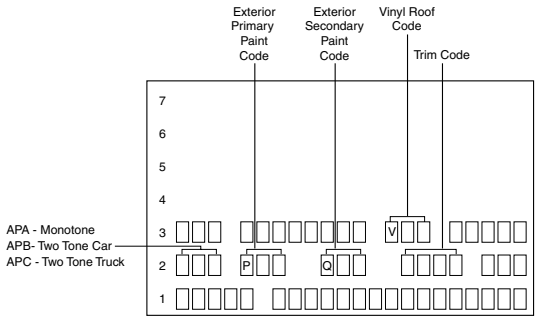
Durango - Front Passenger Wheel Well

Note: Paint Code may also be found on safety certification label on inside of the driver side door jamb.



DaimlerChrysler Motors
2003 Model Year
Color Compatibility Guide

The DaimlerChrysler Color Compatibility Guide is a tool to help distinguish colors found on a production vehicle not represented as a color code on the Vin Identification Label. Based on the color documentation received from DaimlerChrysler, the data contained herein is presumed to be correct. However, we cannot assume responsibility for error or change.

All colors represented within the Guide are color chipped in the 2003 Color Manual. The color may not be chipped in the Color Manual under the same category as represented within the Color Compatibility Guide. Refer to all color chips under DaimlerChrysler.

How To Use The Color Compatibility Guide

Locate the Exterior three digit "P" Color Code (ie: PB2) found on the Vin Identification Label. Refer to the DaimlerChrysler Color Code Location page located in the 2003 Color Manual.

The Guide is listed in alphabetical order by the three digit "P" Color Code which can be found in the first column titled Exterior Body Color. Locate the correct three digit "P" Color Code. The DaimlerChrysler three digit "Q" Lower Color Code, Color Name and Sherwin-Williams refinish number(s) are also represented.

Next, refer to the Model Name column for the correct model.

Read straight across the page for information pertaining to the model(s). All Specialty colors may not be seen on each model. If a Specialty part is an Exterior color, it may not be represented under the column heading. In each of the categories, the DaimlerChrysler Color Code is represented along with the Sherwin-Williams refinish number and the color family to which that specialty part belongs.

Exterior Body Color	Model Name	Accent Bumper/Fascia/Cladding Lower Tu-Tone Molding/Rocker Molding Wheel Flares	Accessory Grille/Air Dam Running Board Step Pad/Roof Rack Hard Top	Wheel	Interior

Color Compatibility Guide

The Ford Color Compatibility Guide is a tool to help distinguish colors found on a production vehicle not represented as a color code on the Vin Identification Label. Based on the color documentation received from Ford, the data contained herein is presumed to be correct. However, we cannot assume responsibility for error or change.

All colors represented within the Guide are color chipped in the 2003 Color Manual. The color may not be chipped in the Color Manual under the same category as represented within the Color Compatibility Guide. Refer to all color chips under Ford.

How To Use The Color Compatibility Guide

Locate the Exterior two digit Color Code (ie: AQ) found on the Vin Identification Label. Refer to the Ford Color Code Location page located in the 2003 Color Manual.

The Guide is listed in alphabetical order by the Ford two digit Color Code which can be found in the first column titled Exterior Body Color. Locate the correct two digit Color Code. The Ford "M" Number, Color Name and Sherwin-Williams refinish number(s) are also represented.

Next, refer to the Model Name column for the correct model.

Read straight across the page for information pertaining to the model(s). All Specialty colors may not be seen on each model. If a Specialty part is an Exterior color, it may not be represented under the column heading. In each of the categories, the Ford Color Code is represented along with the Sherwin-Williams refinish number and the color family to which that specialty part belongs.

Color Compatibility Guide

The General Motors Color Compatibility Guide is a tool to help distinguish colors found on a production vehicle not represented as a color code on the Vin Identification Label. Based on the color documentation received from General Motors, the data contained herein is presumed to be correct. However, we cannot assume responsibility for error or change.

All colors represented within the Guide are color chipped in the 2003 Color Manual. The color may not be chipped in the Color Manual under the same category as represented within the Color Compatibility Guide. Refer to all color chips under General Motors.

How To Use The Color Compatibility Guide

Locate the Exterior "WA" Number (ie: WA132A) Color Code found on the Vin Identification Label. Refer to the General Motors Color Code Location page located in the 2003 Color Manual.

The Guide is listed in numerical order by the General Motors "WA" number which can be found in the first column titled Exterior Body Color. Locate the correct "WA" number. The two digit General Motors Color Code, Color Name and Sherwin-Williams refinish number(s) are also represented.

Next, refer to the Model Name column for the correct model.

Read straight across the page for information pertaining to the model(s). All Specialty colors may not be seen on each model. If a Specialty part is an Exterior color, it may not be represented under the column heading. In each of the categories, the General Motors "WA" number is represented along with the Sherwin-Williams refinish number and the color family to which that specialty part belongs.

Various gloss levels of Black (WA848) are available and are color chipped in the Miscellaneous category in the Color Manual. Each gloss level is represented by a separate refinish number. It is important to determine the correct gloss level necessary for repair to determine the correct refinish formula is used.
