

SUPPORTING SUSTAINABLE BUILDING

With Health Product Declarations for Coil and Extrusion Metal Coatings

As sustainability standards and material transparency requirements continue to evolve, access to clear, reliable product information has never been more important. From OEMs and architects to building owners and homeowners, our team is here to help you navigate documentation needs, certification requirements and product selection to support project success.

To support your sustainability goals and certification requirements, we offer multiple Health Product Declarations (HPDs). These documents provide a transparent, **third-party-verified** view into the ingredients used across our coatings portfolio.

Color can DO ANYTHING.

WHAT ARE HPDs?

HPDs provide a standardized, recognized format for disclosing product ingredients and associated hazard information. Architects and specifiers are increasingly requesting documentation to support material selection, regulatory compliance and building certifications.

By making these HPDs available, we are supporting you to:

- Make informed material decisions
- Respond to architect and specifier requests with confidence
- Support transparency and responsible building practices
- Streamline certification documentation

OUR AVAILABLE PRODUCT HPDs

These HPDs cover a significant segment of our coatings portfolio, from high-performance fluoropolymers to trusted polyester options, supporting both exterior and interior applications.

Coil Coatings

- Fluropon® - Planned Q3
- WeatherXL™ - Planned Q3
- PolyPREMIER® - Planned Q4
- Flurothane® - Planned Q4
- Illumipon™ - Planned Q4

Extrusion Coatings

- Fluropon® - Published
- Acryliccoat® II - Planned Q4
- Super Dynapon® - Planned Q3

Where can I find HPDs?

- Sherwin-Williams Coil Coatings Sustainability Hub
- Ecomedes
- HPD Public Repository

HELPING YOU ACHIEVE YOUR CERTIFICATION GOALS

Many building programs require ingredient disclosure and coating transparency for products to qualify. Our HPDs are designed to help you meet these requirements, particularly in applications where metal building products rely on coating information to be included in certification submissions. By providing this **third-party-verified** documentation, we help ensure your products remain eligible and competitive in sustainability driven projects.

Our HPDs support participation in programs such as:

- LEED v5 U.S. Green Building Council
- Living Building Challenge
- WELL Building Standard
- Other regional and project-specific sustainability requirements

**WE'RE HERE
TO SUPPORT
YOUR GOALS**

Whether you're responding to an architect's request, preparing a certification submission or evaluating coatings for your next project, we're ready to support you every step of the way.
