

# PROTECTING STRUCTURAL STEEL

STEELSPEC™ SHOP COAT PRIMERS

BUILDING  
SOLUTIONS

### PROTECTING STRUCTURAL STEEL AND IMPROVING SHOP THROUGHPUT

Our Steel Spec product portfolio is versatile by design, with coatings to meet your specific surface preparation, application, production and/or service requirements. At Sherwin-Williams Protective & Marine, we're focused on efficiency. You can depend on us to deliver the proven coatings and services you need to accelerate your business.

#### SYSTEMS:

Steel Spec™ 1000 Series and Steel Spec™ WB primers are appropriate for light commercial or architectural construction. They are designed for application over mill scale or blasted steel when long-term corrosion protection during construction is not required. They are weldable and can be top-coated with alkyds and acrylic latex finish coats.

#### END-USES:

Steel Spec is recommended for:

- Light industrial projects
- Manufacturing facilities and new construction
- Commercial and residential projects
- Multi-use facilities

#### AVAILABLE IN:

- Five-gallon container, 55-gallon drum and totes

#### FEATURES & BENEFITS:

- HAPs free version available
- Outstanding protection during shipping and handling
- For use in light commercial and/or architectural construction where steel will be exposed to an environment of C2 or less (per ISO 12944)
- Exceptional application characteristics
- Single component
- Provides performance comparable to products formulated to SSPC Paint 15
- Provides performance comparable to products formulated to SSPC Paint 25
- Provides performance comparable to CISC/CPMA Standards 1-73a and 2-75

### AVAILABLE COLOR OPTIONS

Both the alkyd and the water-based primers are available in red and gray, which have been matched to industry standard coil coatings.
