SHERWIN-WILLIAMS®

 industrial.sherwin.eu

THE SINGLE SOURCE FOR ALL YOUR COATING NEEDS

As a leading global coatings supplier, Sherwin-Williams offers a complete portfolio of energy sector products and systems. As an innovative partner in your supply chain, we bring value to the finishing process by providing total solutions, including on-site technical assistance, customized sustainable products, colour and design services and process improvement expertise.

INNOVATION

Pushing the boundaries of coating technology

Our research and development teams are committed to delivering the most innovative coating solutions to our customers. We can meet your requirements and support your ever-increasing production demands.

SERVICE

Preserving every detail

We have an expansive worldwide network of technical service representatives who are ready to help you achieve your production, quality, application and training goals.

QUALITY

Delivering consistency globally

We understand the need for colour and performance uniformity among OEM locations and subcontractors. We are dedicated to delivering quality products that meet your performance expectations, no matter where your operations are in the world.

SUSTAINABILITY

Respecting and protecting people and our planet

Sherwin-Williams focuses on bringing sustainable coating solutions to market, and we are committed to leading the development of sustainable processes. Whether we're assessing programs focused on employee safety or ways that we can effectively conserve resources, protecting the world we live in is a core value that has been with us since 1866.

YOUR TOTAL SOLUTIONS PROVIDER

Sherwin-Williams understands the nuances of your operational environment – delivering innovative solutions engineered for performance, longevity and productivity. Our class-leading portfolio of liquid, powder and electrodeposition technologies are manufactured to the highest of quality standards. Whether you are finishing transformers, enclosures, busbars, switchgear, or motors and generators, our coating systems are tailored to meet your aesthetic and performance requirements for weatherability, chemical resistance and corrosion.

Visit industrial.sherwin.eu to learn more about our complete energy portfolio or send an e-mail to: gi.emeai.energy@sherwin.com

DEVELOPING PRODUCTS THAT PROTECT OUR FUTURE

Sherwin-Williams is committed to reducing our environmental footprint. We apply a continuous improvement approach to reducing our carbon emissions, energy use and waste generation while expanding our renewable energy use and recycling methods. With our innovative coating solutions, we will support you in achieving your sustainability goals.

ENERGY COATINGS PORTFOLIO

ALL TYPES OF COATINGS FOR ALL TYPES OF ENERGY INFRASTRUCTURE

LIQUID PLATFORMS

We offer durable and economical solutions that can be used in a variety of applications settings with a full portfolio of water-based, high solids, ultra-high solids and direct-to-metal products that meet a wide range of performance, VOC, and application requirements.

High Solids

Reduce VOC emissions while providing a high level of gloss, smooth appearance, application robustness and long-term weathering performance.

Ultra-High Solids

Keeps the performance of a traditional solvent coating while reducing VOC emissions.

Direct-to-Metal

Minimizes application steps, energy consumption and labor, while simultaneously providing effective protection and outstanding performance.

Water Based Coating Technology

Water-based coatings reduce VOC emissions, minimize fire and hazard ratings for coatings used in production, and delivers excellent film appearance and performance.

POWDER TECHNOLOGY

Sherwin-Williams powder solutions deliver unparalleled durability and flexibility to improve efficiency without compromising quality. This is achieved through a robust portfolio of performance-driven and economical products.

Super Durable

Vast product portfolio that meets the harshest weathering requirements, designed for machines and equipment in outdoor operating environments.

High Edge Coverage

Offers the highest level of protection on difficult to cover edges. Provides the highest level of durability and resistance to corrosion equally on all surfaces.

TGIC-Free

Meet wide range of TGIC-free specifications and compliance regulations while delivering the performance your equipment requires.

Low-Temperature Cure

Offers fast curing speed and low-curing temperature while maintaining protection and performance, thus greatly reducing energy consumption and increasing production throughput.

Powdura® ECO

Utilizes post-consumer recycled materials offering manufacturers an additional point of differentiation while lowering your carbon footprint.

One Coat (Dust-on-Dust)

Two-coat, one-cure powder solutions provide decreased coating process time, impacting the cure cycle and temperature.

ELECTRODEPOSITION PAINT

Our electrodeposition technology delivers exceptional corrosion resistance and achieves a uniform, even film on complex, hard-to-paint parts.

Cathodic Epoxy

Provides exceptional corrosion resistance and reduces system operating costs.

Cathodic Acrylic

High-quality corrosion resistance in a system with excellent exterior durability.

APPROVALS AND SPECIFICATIONS FOR THE ENERGY MARKET:

Our coatings are designed to meet or exceed all common industry standards, including:

- UL
- ISO 12944
- IEEE

UL certifications are required for multiple markets and components such as transformers, enclosures and busbar.

For more information about coatings and specifications please contact your local Sherwin-Williams representative or reach out to gi.emeai.energy@sherwin.com.

OBSSESSED WITH YOUR BUSINESS

HELPING YOUR BRAND, PRODUCTS AND COLOURS LAST

We are obsessed with protecting your colours, your products and your brand while improving your operations and increasing your productivity. Let us be your secret weapon.

WHY SHERWIN-WILLIAMS

For over 150 years, Sherwin-Williams has been providing trusted coating solutions that protect and beautify what matters most to our customers. We recognize that you choose to rely on us for what is often the most visible and iconic element of your brand or product, and that's a responsibility we take seriously.

Our finishing solutions go beyond the coatings to deliver value in every aspect of your process. We

proudly offer the industry's most innovative products and comprehensive programs, delivered by our people who understand what matters most to OEMs and finishers. To earn your business, we become your partner, utterly committed to your long-term success. With the coatings, knowledge, tools and support you need, let us show you how we will be your complete solution.

VALUE PROPOSITIONS

Sustainability

- Eco-conscious coatings enabling lower CO₂ emissions
- Low VOC, high solid content
- Complete regulatory compliance

Product Performance

- Customized solutions including global OEM approvals
- New technologies and innovations
- High gloss and colour retention
- Excellent visual appearance

Cost Savings

- Increased production capacity
- Higher first pass yield
- Competitive cost per applied unit

World Class Service

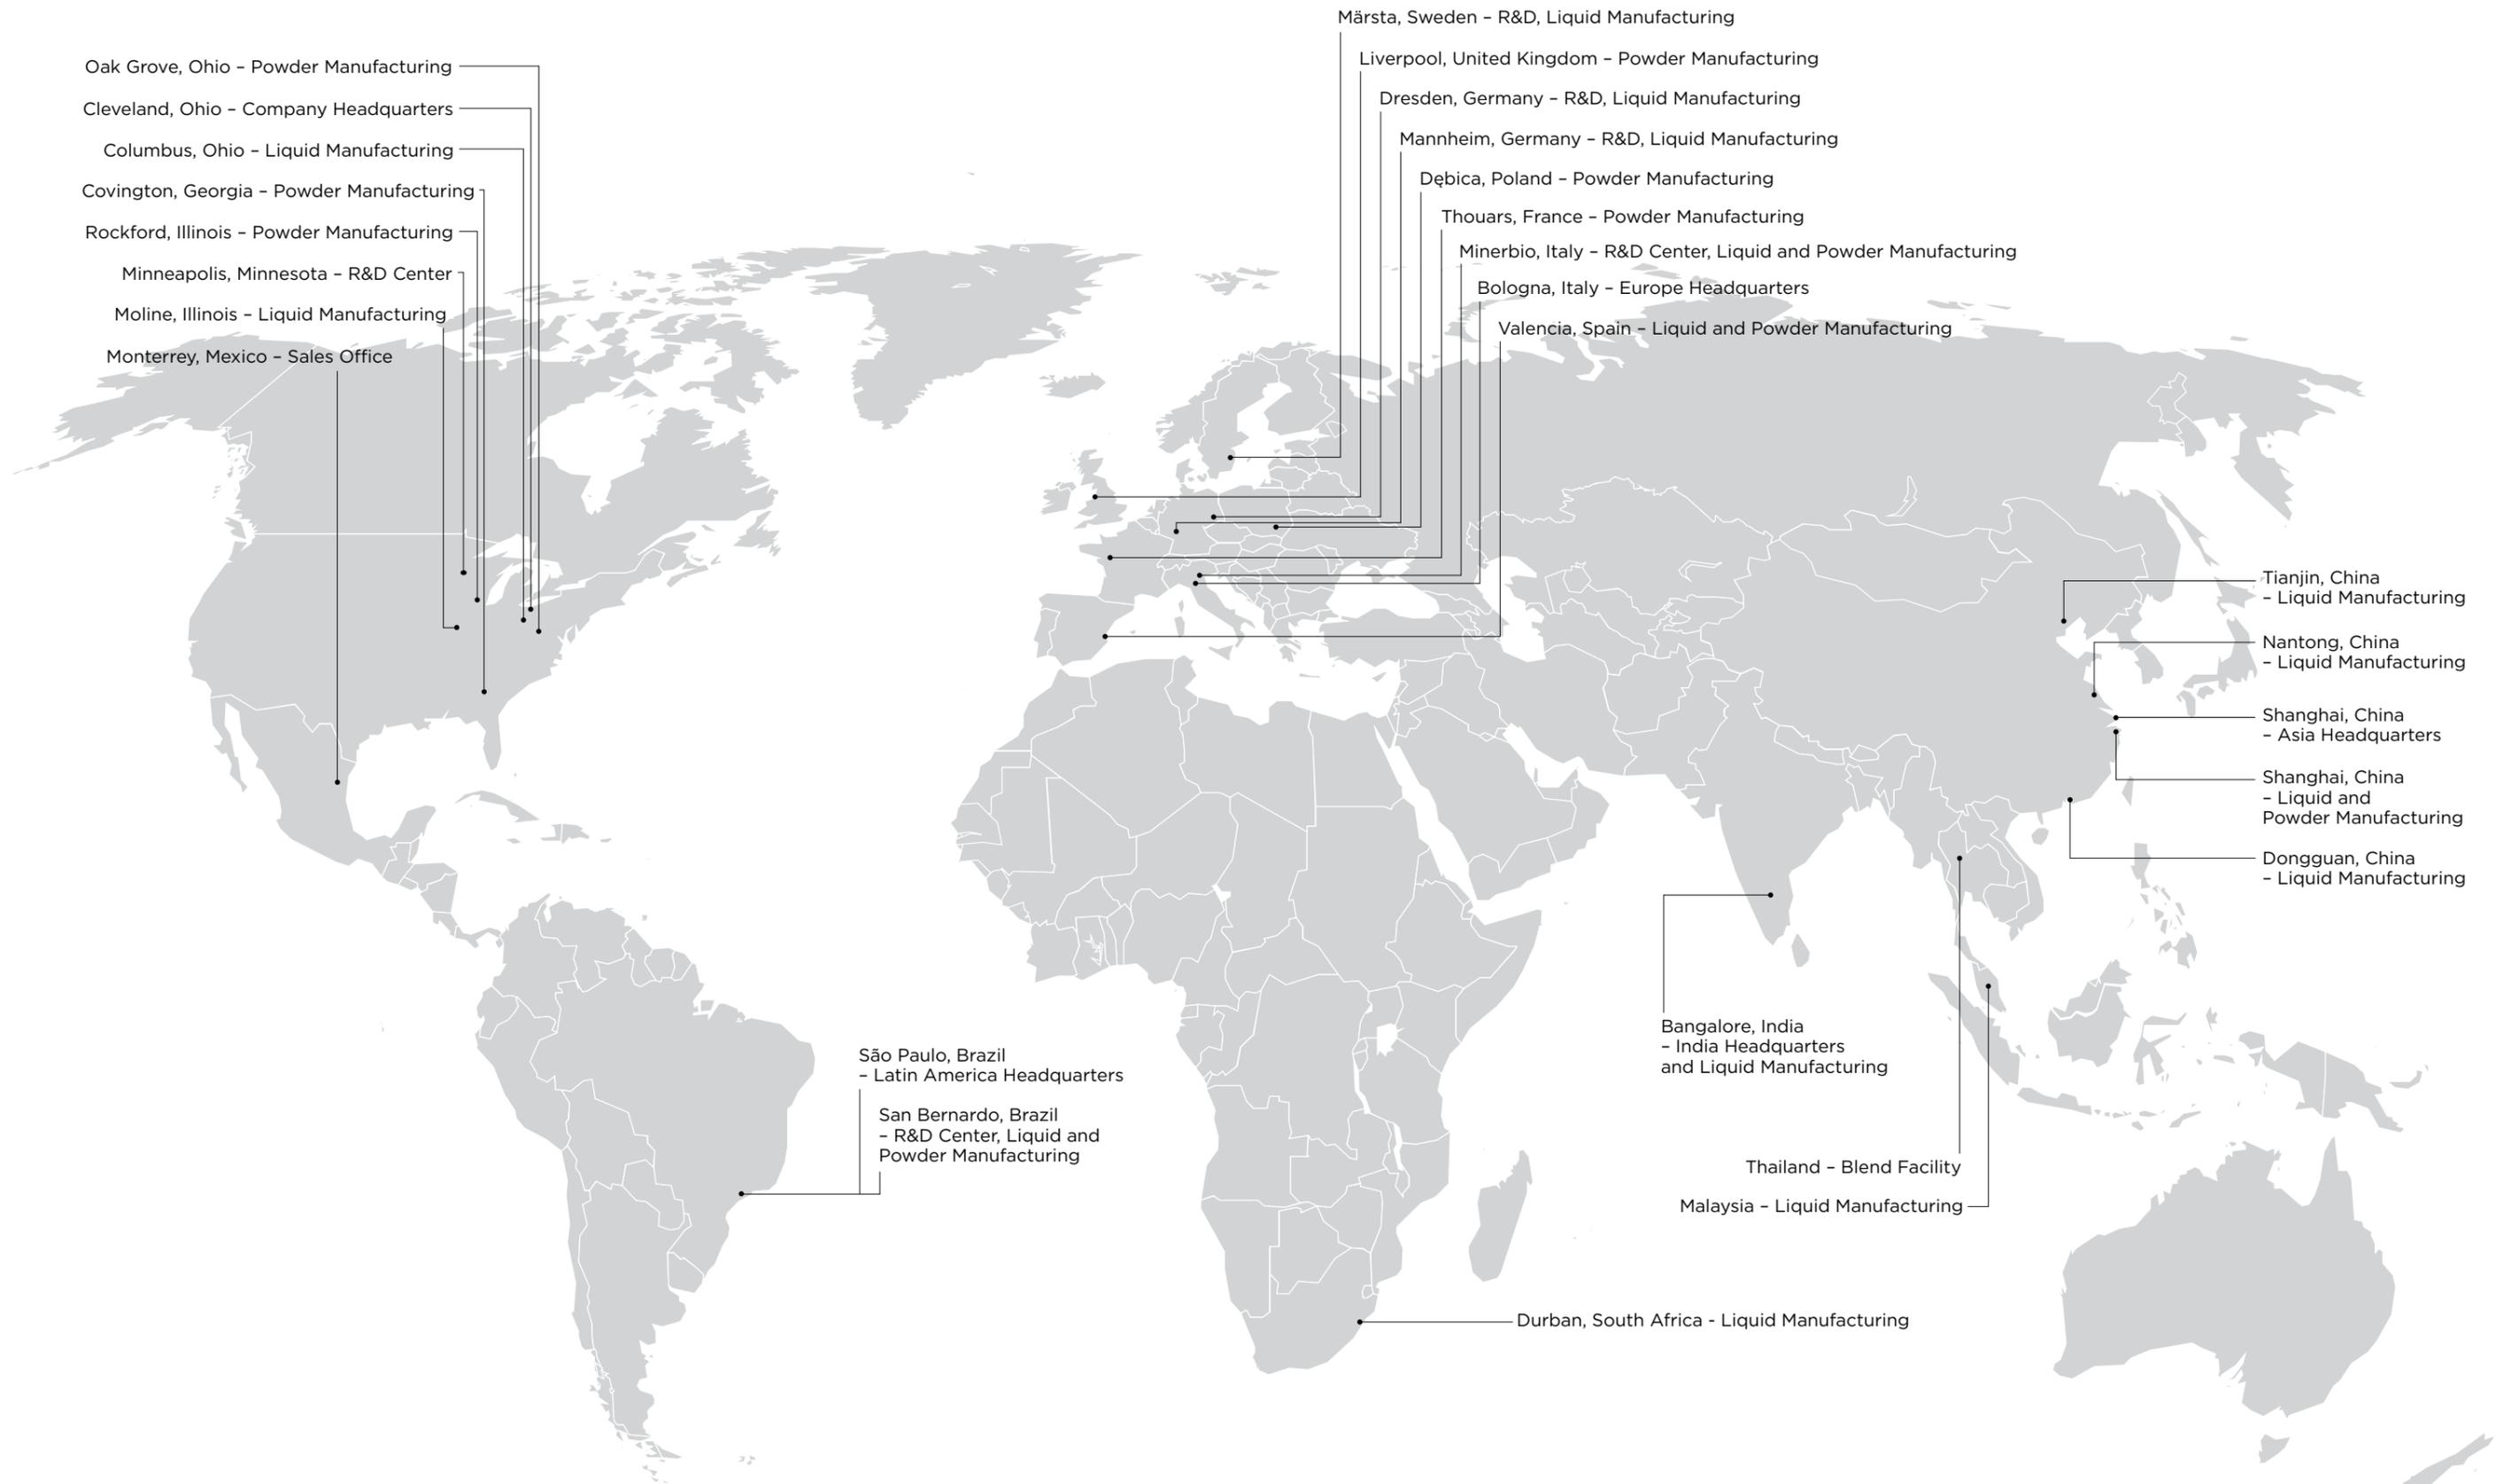

- Local technical and commercial support for continuous monitoring of process and performance optimization
- Energy coatings subject matter expertise
- Global manufacturing footprint
- Multiple manufacturing sites in every region
- Localized facility model enabling short lead times and localized transactions

FOCUSED ON THE DETAILS

It is often tough to see the details of what goes into protecting the appearance and performance of large energy infrastructure investments such as power generation and distribution equipment. Noticing the little things is precisely what our team does every day. Providing our customers with colour consistency, edge coverage and corrosion resistance are some of the many reasons why leading global OEMs and their tier

suppliers consistently choose our products. But that's just part of the story. Our exacting technical process creates products that meet the tightest specifications, and our global team ensures that the right solution is available wherever a product is manufactured. The little things make a big difference, especially in energy equipment.

GLOBAL SUPPORT, REGIONAL FOCUS

ENERGY INDUSTRIAL COATING SYSTEMS

Offline is not an option

SHERWIN-WILLIAMS®

At Sherwin-Williams, we think about industrial finishing differently, continuously seeking the perfect solution to help your products win over your customers. Whether you need the most rugged and protective coating, a technical expert to provide answers and hands-on support, consistently perfect colour in just the right gloss, or a custom solution created just for you — we are here to help. We are Sherwin-Williams General Industrial Coatings, and we are obsessed with giving you the competitive edge.
