POLANE® 8910

FULL GLOSS RANGE MULTI-PURPOSE POLYURETHANE ENAMEL

FLEXIBLE ON THE LINE, DURABLE IN THE FIELD

Polane® 8910 is a two-component coating providing a full gloss range with excellent exterior durability and chemical resistance properties, and meets the most stringent VOC regulations. Applicators will experience maximum flexibility, while end users will enjoy outstanding field performance.

Polane 8910 offers outstanding adhesion to multiple substrates, including pretreated or primed steel and aluminum. It can also be applied direct to plastic on ABS, PVC, polycarbonate, and more. One product provides OEMs and applicators a full gloss range in almost any color, with outstanding performance — and is available from more than 70 Sherwin-Williams facilities across North America.

FULL RANGE OF GLOSS, FINISH, AND COLOR

Gloss range (10-90 units at 60°F) available in virtually any color, providing applicators with ultimate flexibility from a performance-level coating

APPLICATION FLEXIBILITY

Formulated as a 2.8 or 3.5 lb/gal VOC, easily applied through conventional spray, HVLP, airless, air-assisted airless and electrostatic, and suitable for metal or plastic substrates

EFFICIENCY

Improved finishing line output with up to two hours of pot life and short dry times; force dry (20 minutes at 180°F), dry to touch (50-60 minutes, ambient)

DURABILITY

Provides outstanding salt spray, humidity, and chemical resistance, so your finish looks as pristine in the field as it did in the spray booth

At Sherwin-Williams, we think about industrial finishing differently, continuously seeking the perfect solution to help your products win over your customers. Whether you need the most rugged and protective coating, a technical professional to provide answers and hands-on support, consistently perfect color in just the right gloss, or a custom solution created just for you, we are here to help. We are Sherwin-Williams General Industrial Coatings, and we are obsessed with giving you the competitive edge.
