TACTICAL DEFENSE 2.0

New and improved MIL-DTL-53039 MOISTURE CURE URETHANE delivers time-saving application benefits, and consistency across all colors and products.
MOISTURE CURE URETHANE

Army Research Lab-approved MIL-DTL-53039 Moisture Cure Urethane from Sherwin-Williams optimizes throughput and consistency in your coatings operation. Achieve high film build in any application environment through its enhanced sag and blister resistance, and viscosity consistency from batch to batch. Lower your material and labor costs while delivering unparalleled protection to your military assets through its ready-to-spray, reducer-free formula.

HIGHLIGHTS
Approved by Army Research Lab
- Meets MIL-DTL-53039 requirements
- Exceptional application properties, even in high humidity environments
- Improved adhesion
- Sag resistant, even up to 15 mils wet
- Achieve film builds ≥ 7.5 mils dry before blistering
- Viscosity consistency across all colors
- Ready to spray – no reducer needed

DYNAMIC SOLUTIONS
Beyond meeting performance specifications, our military coating solutions help streamline your finishing operation. Whether you’re a government agency, original equipment manufacturer or tier supplier, our unrivaled support is designed to keep your projects on-track and on-budget – from the first stroke of paint to coating restoration and touch-ups.

WIDESPREAD DISTRIBUTION
With more than 130 distribution points across the United States, you can gain access to our products and services within the same or next day – delivering the quick turnaround and quality solutions your customers demand.
