POWDURA® POWDER COATINGS

VISUALIZE THE POSSIBILITIES OF POWDER.
YOUR UNIQUE COATING SOLUTION AWAITS.

Sherwin-Williams Powdura Powder Coatings offer the breadth and flexibility needed for your finishing operation. Powdura coatings offer a wide assortment of in-stock colors and textures, as well as special effect finishes and custom colors available just-in-time. With the benefits of the largest distribution platform in the industry, an expanding global presence, and a commitment to providing value-added services and support, Sherwin-Williams is your total finishing solution.

WHERE POWDURA POWDER COATINGS ARE USED

- Fencing
- Lawn Equipment
- Outdoor Dining Sets
- Playground Materials
- Steel Fabrication

TECHNOLOGIES

EPOXY

Epoxy powder coatings are the technology of choice for high-performance applications, and Powdura Epoxy Coatings will meet or exceed most performance expectations. These coatings combine outstanding salt spray resistance and excellent chemical performance with exceptional film hardness. Our epoxy coatings are often selected for functional or corrosion-inhibiting applications, such as industrial equipment, under-hood automotive, pipe coatings or primers. In addition to outstanding performance, finishers can also benefit from a wide range of cure capabilities.

HYBRID

When you desire the mechanical film properties of an epoxy, but prefer the overbake stability of a polyester, hybrid technology is an excellent solution. Powdura Hybrid Powder Coatings combine the technologies with exceptional transfer efficiency — giving you the ability to completely cover and protect many hard-to-coat parts. As the proven choice for many finishers, common end uses for Powdura Hybrid Powder Coatings include metal office furniture, store fixtures, electronic cabinetry and racking.

POLYESTER URETHANE

Polyester urethane technology provides a finish that lasts, and Powdura Polyester Urethane Coatings are no exception. Combining exceptional resistance to weathering and UV light with a unique high-definition finish, Powdura Polyester Urethanes are an excellent choice for finishing lawn and garden equipment, outdoor furniture, electronic enclosures and automotive components.

TGIC AND TGIC-FREE POLYESTER

Polyester powder coatings are the optimal choice when versatility is critical, and Powdura Polyester Coatings provide coating solutions for a wide range of applications and finishers. Available in TGIC and TGIC-Free formulations, Powdura Polyester Coatings combine excellent color and gloss retention with great overbake stability and high-quality mechanical properties — making them ideal for various applications, including electronic cabinetry, case goods, fencing, metal building products, lighting, furniture and heavy equipment.

NSF

Powdura NSF-Certified Powder Coatings are specially formulated to meet the performance standards of the National Sanitation Foundation (NSF) International organization.

- NSF 51 products are certified hybrid and epoxy powder coatings that may have incidental contact with food products, and are suitable for applications that include food displays and processing equipment.
- NSF 61 products are certified epoxy powder coatings used as single-coat applications for valves, fittings, pipes and tanks used to distribute potable water.

UL

We understand that obtaining Underwriters Laboratories (UL) approval can be critical for a wide range of products, and Sherwin-Williams produces a multitude of solutions that have been approved by UL. If you need such a product, contact your local sales representative and they can help you select the optimal coating to meet your requirements.

RAL

Featuring 188 solid, high-gloss and satin sheen colors in Super Durable TGIC-Free Polyester technology, we deliver the exact color you need and fast turnaround to meet your tight deadlines. Sherwin-Williams liquid coatings can also be custom-ordered in many RAL colors to provide a wide range of coating solutions for a variety of substrates requiring both liquid and powder finishes.

ADDITIONAL POWDURA PRODUCTS/TECHNOLOGIES INCLUDE SUPER DURABLE POLYESTERS, SUPER DURABLE URETHANES, SPECIAL EFFECTS, SUCH AS SPICE AND METALLICS, MIL-SPEC APPROVALS, AND COATINGS THAT MEET AAMA SPECIFICATIONS 2603, 2604 AND 2605.

CLEARCOAT

Clear topcoats are typically used as an added layer of protection. Clear topcoats are commonly applied over powders with Aluminum or Mica, and are used to inhibit premature gloss and/or color changes. Testing is recommended to confirm acceptability.

READYMATCH®
TOUCHUP

Regardless of finish application or color, Sherwin-Williams has your touch-up solution with ReadyMatch. These aerosols are in-stock and can be color-customized, making touch-up easier and more efficient. For more information on the benefits of ReadyMatch and other solutions from Sherwin-Williams, please contact your local representative.

¹ Epoxy Powder Primer/Interior Use Only. NOT intended for use under Chemical Agent Resistant Finish Coatings (CARC)

² Epoxy Powder Primer for use with Chemical Agent Resistant Finish Coatings (CARC)

³ For use as a camouflage, Chemical Agent Resistant Finish Coating (CARC)

⁴ Coating conforms to MIL-PRF-32550, Type 3 Form A

PLEASE NOTE: Exterior applications are not recommended for Epoxy or Hybrid products.

OEM specified and approved finishes are available. Please contact your Sherwin-Williams Representative for details.

Due to the printing process, colors shown approximate as closely as possible to the actual paint colors. Colors are provided by the Sherwin Williams Company.
