POWDURA® 4000 ANODITE COATINGS

Powdura® 4000 Anodite powder coatings are now available as part of this 12-color preferred collection. With a range of attractive shades, this system has built-in, super durable TGIC-Free technology for long-term resistance against the weather. The use of mica pigments mimics anodized finishes without the potential problems of anodizing. Powdura 4000 Anodite coatings can be repaired, applied to more than aluminum, and have greater color consistency between parts. Designed to meet AAMA 2604 specifications, Powdura 4000 coatings can be applied in one coat with no clearcoat. Applications include: windows, doors, stairwells, handrails, wall panels, benches, lighting, and high traffic areas.

LOW GLOSS, ULTRA-MATTE FINISH

Sherwin-Williams has developed a soft, smooth-to-the-touch coating system with gloss levels from 5-15 units and mica 5-35 units. With a smooth surface and ultra-matte finish, they work in both heavy traffic areas and higher elevations. For that anodized look in a finish that's required to last, Powdura 4000 Anodite series provides a low gloss, matte surface, allowing you to maintain your desired look for years to come.

FEATURE	BENEFIT
Anodized look in one-coat application	Consistent colors, reduced process times, and improved weatherability over anodized metals
Ultra-matte, smooth finish	Provides less visual defects and an anodized look with the smoothness and protection of a powder coating
Designed to meet AAMA 2604 performance standards	Meets or exceeds industry weathering specifications and backed with a 5-year warranty
Available in a wide range of styles and colors	Designers can create their perfect anodized look in a coating that's engineered to last

WHEN EXTRA CORROSION RESISTANCE IS NEEDED

Powdura® Super Durable Primer (RAS5-80000) resists damage from harmful UV rays and provides an extra barrier to aid in corrosion prevention. When used with Powdura topcoats and applied over properly pre-treated aluminum, the coating systems are designed to meet or exceed their respective AAMA specifications for residential and commercial applications.
