FURNI CLEAR TM1502

TWO PACK SOLVENT BORNE LACQUER DESIGNED FOR USE ON MOST WOODEN SUBSTRATES

TM1502 is a two pack solvent borne lacquer designed for use on most wooden substrates.

Its formulation and hardener options give it several built in durability advantages that benefit both performance and long term appearance. Gives a very tough and resistant surface.

TM1502 also gives a high protection against yellowing with SV3000 hardener.

FEATURES	WHY THIS MATTERS FOR DURABILLTY	BENEFITS
TM1502 gives a tough and resistant surface.	The hard, crosslinked coating protects the wood from abrasion and chemicals like hand cream.	Products retain their quality and surface integrity for many years.
The pot life of the ready mixed lacquer (paint + hardener + solvent) is up to 8 hours.	A long pot life prevents premature gelling, keeping viscosity stable during production.	Operators can work efficiently without rushing, ensuring high quality, durable surfaces across batches.
TM1502 provides high protection against yellowing, especially when used with SV3000, a non yellowing hardener. It can also be mixed with TV4135 for faster curing. TV4135 is a new hardener with <0,1% monomers.	Non yellowing hardeners slow down the natural discoloration caused by UV exposure and aging.	Surfaces stay clearer, more transparent, and visually appealing for longer periods.
	Faster curing with TV4135 improves early stage film strength, reducing vulnerability during handling.	Manufacturers can choose between minimum yellowing (SV3000) or faster process times (TV4135) without sacrificing durability.

SHERWIN-WILLIAMS – YOUR COATING SOLUTIONS PARTNER

The Sherwin-Williams Company (SHW), through its Performance Coatings Group Division, is an industrial coatings leader that delivers local finishing solutions on a global scale to OEMs and tier suppliers.
Comprised of coatings professionals dedicated to providing unparalleled customer support, Sherwin-Williams brings value to the finishing process through solutions like on-site technical assistance, customized products, colour and design services, and process improvement expertise.
With innovative liquid and powder coating technologies to protect wood, metal and plastic, as well as finishing equipment and supplies needed for coatings application, Sherwin-Williams utilizes an infrastructure spanning six continents to provide better finishing solutions for manufacturers.

Since 1866, Sherwin-Williams has provided manufacturers and finishers with the coatings they need to make their products look better and last longer, while helping their operations meet productivity and sustainability goals.
For the industrial wood markets, our innovative solutions go beyond coatings to include knowledge, tools, equipment, supplies, and industry-leading support.
We're more than a coatings provider – we are Your Coating Solutions Partner.
