Evergreen Fog | SW 9130

A YEAR OF GROWTH

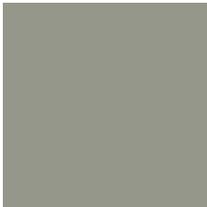

Evergreen Fog, our 2022 Color of the Year, exhales nature into product design, and its green, biophilic influences set the tone for a year of growth. This color is soft and organic, which allows it to easily evolve into a wood stain across both interior and exterior design. A welcome offering to flooring, kitchen and bath, furniture, architectural building products, and millwork, Evergreen Fog balances a variety of versatile and sophisticated stains for refreshing, restorative designs.

”

This palette’s earthiness and rich warmth - with its sepia softness - balances the lush refinement of art deco silhouettes on the radical raw edge of 1980s postmodernism.

ORGANIC NEUTRALS

The Method collection — immersed in organic neutrals — brings soft tonal luxury to product designs. Grounded layers that whisper “barely there” finishes paired with refined woodgrain accents feel rooted in nature. Bleached tones are reminiscent of sunbaked driftwood, providing understated texture that is well-worn and familiar. This palette’s earthiness and rich warmth results in pieces that balance a polished look with rustic authenticity.

Art deco - Intention - Modern organic - Postmodernism

SHERWIN-WILLIAMS.

Since 1866, Sherwin-Williams has provided manufacturers and finishers with the coatings they need to make their products look better and last longer, while helping their operations meet productivity and sustainability goals. For the industrial wood market, our innovative solutions go beyond coatings to include knowledge, tools, equipment, supplies, and industry-leading support. We’re more than a coatings provider - we are Your Coating Solutions Partner.
