ULTRA-CURE® 6900 WATERBORNE REACTIVE STAINS

FOR SOLID AND ENGINEERED WOOD FLOORING

Suitable for solid and engineered wood flooring, Ultra-Cure 6900 Waterborne Reactive Stains deliver an attractive weathered appearance in a single application, enhancing the natural beauty of the wood grain. These stains naturally react with tannins in the wood, resulting in excellent clarity and grain sharpness. Designed for use with Ultra-Cure UV-Cure flooring sealers and topcoats, these stains provide a unique, aged patina look that is popular in the flooring market today.

- Enhances the natural grain variation
- Designed for woods with a high tannin content
- Final appearance will vary based on wood species and tannin content
- Available in the following packaged colors:

6928 Medium Gray Reactive Stain*

6925 Light Brown Reactive Stain*

6923 Charcoal Reactive Stain*

6922 Dark Fumed Reactive Stain*

6921 Fumed Reactive Stain*

6920 Clear Reactive Stain* (custom colors available)

*Actual color may vary from sell sheet representation. To confirm your color choice prior to purchase, please view a physical color chip, stain card or stained sample.

Since 1866, Sherwin-Williams has provided manufacturers and finishers with the coatings they need to make their products look better and last longer, while helping their operations meet productivity and sustainability goals. For the industrial wood market, our innovative solutions go beyond coatings to include knowledge, tools, equipment, supplies and industry-leading support. For a better finish, ask Sherwin-Williams.
