

CERTIFICATE OF APPROVAL

No CF 6088

This is to certify that, in accordance with
TS00 General Requirements for Certification of Fire Protection Products
The undermentioned products of

Sherwin-Williams UK Limited
Avenue One, Station Lane, Witney,
Oxfordshire, OX28 4XR, UK
Tel: +44 1204 521771

Have been assessed against the requirements of the Technical Schedule(s)
denoted below and are approved for use subject to the conditions
appended hereto:

CERTIFIED PRODUCT
FIRETEX FX1007 and
FIRETEX FX2007

TECHNICAL SCHEDULE
TS15 Intumescent Coatings
for Steelwork

Signed and sealed for and on behalf of Warringtonfire Testing and Certification Limited

Paul Duggan
Certification Manager

Issued: 28th June 2022
Reissued: 15th November 2022
Valid to: 31st May 2027

CERTIFICATE No CF 6088

Sherwin-Williams UK Limited

FIRETEX FX1007 and FIRETEX FX2007

1. This approval relates to the use of FIRETEX FX1007 or FIRETEX FX2007 for the fire protection of I/H beams and columns, circular hollow columns as well as rectangular/square hollow columns and beams. The precise scope is given in the Tables of Results which show the total dry film thickness of FIRETEX FX1007 or FIRETEX FX2007 (excluding any primer and topcoat) required to provide fire resistance periods in accordance with EN 13381-8:2013. The scope includes periods of fire resistance of up to 75 minutes for I/H beams, up to 90 minutes for I/H columns, up to 75 minutes for Circular hollow columns, up to 60 minutes for Rectangular/Square hollow columns and up to 45 minutes for Rectangular/Square hollow beams.
2. This certification is provided to the client for their own purposes and we cannot opine on whether it will be accepted by Building Control authorities or any other third parties for any purpose.
3. The products are approved on the basis of:
 - i) Initial type testing.
 - ii) A design appraisal against TS15.
 - iii) Certification of quality management system to ISO 9001: 2015.
 - iv) Inspection and surveillance of factory production control.
 - v) Audit testing.
4. The data referring to three-sided fire exposure of beams relate to beams supporting concrete floor slabs. Separate consideration is required where this is not the case.
5. The data shown is applicable to steel sections blast cleaned to ISO 8501-1 Sa 2.5 or equivalent and primed with a suitable and compatible primer. Specifications of suitably tested and evaluated surface preparations, primers and topcoats are available from Sherwin-Williams UK Limited whose responsibility is to ensure that the FIRETEX FX1007 or FIRETEX FX2007 system is compatible for use in respect of both ambient and fire conditions. The nominal dry film thickness of primer and topcoat should be applied at a nominal thickness tested unless stated otherwise in this certificate.
6. The data shown is applicable to FIRETEX FX1007 or FIRETEX FX2007 applied to horizontal, vertical, flexural and compression members supporting loads up to the maximum design loads specified in EN 1993-1-1.
7. Results from analysis of I/H sections are directly applicable to angles, channels and T-sections for the same section factor.

CERTIFICATE No CF 6088
Sherwin-Williams UK Limited

8. The approval relates to on going production. The product and/or its immediate packaging shall be identified with the manufacturers' name, the product name or number, the CERTIFIRE name or name and mark, together with the CERTIFIRE certificate number and application where appropriate.
9. The data shown in the tables is based on an assessment that complies with the criteria for acceptability incorporated within the CERTIFIRE scheme.
