

A MAINTENANCE AND REPAIR COATING REVOLUTION

REPACOR™ SW-1000

An Offshore Wind Energy Coating Advancement - Now Expanding

Thanks to its practical mixer cartridge, this solvent-free, innovative coating **for maintenance or repair** of mechanically damaged coating areas meets all requirements for a fast application. Developed initially for offshore wind, it is also suitable for other industries like hydraulic steel structures, bridges or offshore oil and gas, whenever a fast but high quality and durable repair coating is needed.

2-PACK REPAIR COATING WITH ULTRAFAST CURING

Repacor SW-1000 fulfills all the requirements for touching up or repairing damaged coating surfaces in just one operation. This outstanding repair product is solvent free, UV resistant and can be applied in a single-coat. Using a regular sealant (caulking) gun with mixer cartridge, it is applied as simply as a one-pack coating.

Benefits:

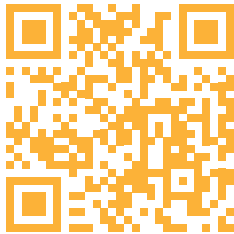

- Easy-to-use packaging for difficult repair jobs
- No need for mixing prior to application
- No pot-life restrictions.
- Ideal to rope-access works
- Single layer, surface tolerant coating.
- Diffusion resistant
- Impact and abrasion resistant
- Colour stable like 2-pack polyurethane top coats
- Solvent free, 100% solids, CMR-free
- Tested and approved for high durability in offshore environment.

Research project for offshore repair concept

In the joint research project “RepaKorr”, the project partners developed the material, technical, conceptual and organisational basis for an on-site repair concept in the offshore sector.

With **Repacor SW-1000**, our R&D department has, through intensive development work, succeeded in establishing another building block of practical products in our offshore portfolio. Since the initial launch, numerous projects have been successfully completed in the offshore sector.
