We offer a wide range of wall systems for virtually any application — from food processing, packaging and storage areas to locker rooms, Bio-Pharm production and healthcare. Each of which is designed to minimize your downtime while giving you the performance you demand. Our coating experts will be there for you to answer your questions, assess your needs and recommend a wall system that meets your requirements.

Seamless, integrated wall and floor systems – the perfect solutions for consumer safety, worker safety and the environment

Clean surfaces are critical in preventing the contamination of food products and lowering the risks related to HAI. These high performance systems can facilitate the sanitation and disinfection processes employed in food processing and healthcare applications. Their smooth and continuous films can promote sustainability through reductions in the amounts of water and chemicals required to properly clean and disinfect the surfaces. These systems also incorporate technologies designed to reduce the risk of moisture-related disbandment on porous substrata.

Why trust something so important to anyone else?

SaniGlass

A high build, fiberglass reinforced waterborne system

SaniGlass systems provide a waterborne epoxy base coat with fiberglass mat reinforcement and polyurethane topcoats. Fiberglass provides outstanding stability and tensile strength for added durability. This low odor, waterborne technology provides fast return to service.

SaniFlex

A 100% solids, flexible system

SaniFlex systems provide a solvent free, unique advantage over rigid epoxy systems by providing crack bridging properties that save time while providing excellent impact and thermal shock resistance.
SaniGlaze
A high build, multi-layer system
SaniGlaze systems utilize a technology that offers significant improvements over typical waterborne systems. Unique crack-bridging properties provide excellent chemical resistance in demanding sanitation areas.

SaniFiber
A high build, fiber reinforced waterborne system
SaniFiber systems represent a technology that offers the additional strength of fiber reinforcement yet provides a smooth paint-like finish with no visible fibers. Designed for the demanding environments in pharmaceutical and food processing applications.

Control-Tech IMP Flex-Wall Systems
Systems for insulated metal panels
These systems were designed for restoration of insulated metal panels commonly found in the food and beverage industry. Compatible with masonry construction, they offer chemical resistance and color and gloss retention.
A COMPLETE LINE OF PRODUCTS.
MARKET EXPERTISE.
ON-TIME DISTRIBUTION.

What else would you expect from a world leader in protective coatings and linings?

It starts with a complete line of time-tested, high-performance products and some of the most innovative and greenest technologies in the coatings industry. But we know that it takes more than product alone to be a world leader in protective coatings and linings. And so do the customers that rely on us every day as we help them protect their business.

That’s where nearly 150 years of coatings industry experience comes in. Add to that a NACE-trained workforce with a combined 3,700 years of experience in corrosion control. And the market-specific knowledge that our experts provide to evaluate, recommend and deliver the highest-performance coatings and linings that protect our customers’ assets.

It also means that we deliver on time, every time from 4,400 company-owned distribution points worldwide. Leave nothing to chance. Your single source of supply. Sherwin-Williams.
