

# PIPECLAD® 5000

## EASY-TO-APPLY EXTERIOR PIPELINE EPOXY

Reliable corrosion protection and application speed are paramount to successfully managing the long-term integrity of pipelines. From the first girth weld to miles of pipeline rehab and repair, Pipeclad® 5000 Exterior Pipeline Epoxy makes pipeline construction and integrity management easy and reliable for pipeline contractors and corrosion engineers.

As part of our Pipeclad® epoxy family of products, Pipeclad 5000 Exterior Pipeline Epoxy is the recommended liquid epoxy repair for Pipeclad powder fusion-bonded epoxy systems, with brush or spray application for all buried pipeline and ground contact utilities.

### BENEFITS

#### High-Performance Application

Increase production and throughput with fast drying times and simple application. Manually apply or spray up to 60 mils wet in one multi-coat pass with ambient spray conditions of 35°F - 150°F (metal surface temperature).

#### Outstanding Protection and Durability

Reduce damage and expedite backfills with excellent gouge, impact and abrasion resistance. When paired with cathodic protection, this coating provides corrosion protection for your high-value pipeline assets.

#### Reduced Waste

Improve your process and reduce product waste with innovative packaging including drums, pails, liter tubs, liter burst pouches, holiday repair 16 ml burst pouches and 1000 ml/400 ml cartridges.

#### Tested and Certified

Maintain compliance with a product that meets or exceeds CSA Z245.30-2014 coating standard.

### HIGHLIGHTS

Ultra-high solids amine-cured epoxy coating

Adhesion over prepared steel and fusion-bonded epoxy coated pipe

Plural spray, brush, roll or broad knife application

Fast and easy to apply

Flexible stocking, delivery and packaging options

Local support and distribution anywhere in North America

## SERVICE THAT STANDS OUT

### The Products You Need Right Now

Get the products you need with same or next-day delivery, in addition to local inventory at more than 4,900 company-owned distribution points.

### Technical Service for Optimal Applications

Our technical service team is filled with industry experts who bring extensive manufacturer equipment training to ensure proficiency throughout the entire coatings process.

### Credit Terms That Fit Your Business

Sherwin-Williams understands the layered business structure of the oil & gas midstream market. That's why we have developed credit terms to meet our customers' needs.

## RECOMMENDED USES

- Buried pipelines – pipes, valves, bends, fittings, fabricated sections and air-to-soil transitions
- Maintenance or rehabilitation coating of existing lines after removal of old coatings or tape
- Spot repair/touch-up of mechanically damaged plant-applied coating
- Girth weld coating on new installations and field tie-ins
- Shop spray applications
- Buried and ground-contact utilities

## THE SHERWIN-WILLIAMS DIFFERENCE

Sherwin-Williams Protective & Marine delivers world-class industry subject matter expertise, unparalleled technical and specification service, and unmatched regional commercial team support to our customers around the globe.

The industry experts at Sherwin-Williams Protective & Marine are renowned authorities in their respective fields of knowledge – including Bridge & Highway, Flooring, Food & Beverage, Fire Protection, Marine, Oil & Gas, Freight Rail, Power Generation, Steel Fabrication and Water & Wastewater. Our global technology expertise in areas including tank linings, passive fire protection, corrosion under insulation (CUI) and testing, and fusion-bonded epoxy has been driving game-changing innovation and influencing global industry standards.
