

SHERWIN-WILLIAMS.

# WATER TANK COLOR DESIGNER

## CONCEPTUALIZE AND VISUALIZE

Optimize your tank design with the Sherwin-Williams Water Tank Color Designer. This web-based tool allows owners, engineers and contractors to create and design color combinations easily in a fully interactive experience.

### HOW IT WORKS:

1. Visit [swcoloryourtank.com](http://swcoloryourtank.com) on your desktop\*
2. Select the desired tank style and size
3. Create your design
4. Virtually spin the water tank to view your creation
5. Save and share your final scheme

### FEATURES:

- Several water tank styles ready to customize – ranging from a hydropillar tank to a ground storage tank
- Access to a variety of colors available in the Sherwin-Williams water tank library
- Option to upload your own logo to view in the design
- Capability to add stripes and select stripe width
- Customizable text – choose font and font size
- An assortment of illustrations to choose from – such as a lion, moose, knight, surfboard, American flag and more!
- Interactive 360° degree viewing
- Professional design support available upon request

### BENEFITS:

- Users can see color combinations on different tank styles from any angle
- Owners, engineers and contractors save time and resources by exploring color and logo options earlier in the design process
- Expansive possibilities within color and design lead to truly one-of-a-kind water tanks
- Users can easily navigate the capabilities of the site

\*Due to sophisticated graphics, the Water Tank Color Designer cannot be used on mobile devices at this time. Users can access the tool's full capabilities on their desktop.

*Note: Computer screens and printers may vary in how colors are displayed, therefore the colors you see may not match the coating's actual color.*
