

**SHERWIN  
WILLIAMS®**

HIGH  
PERFORMANCE  
FLOORING

CENTRAL  
LIBRARY  
CAFE

EVERY SPACE IS A  
PERFORMANCE SPACE.

Every space is a performance space.

Not just theatres and sports arenas.

Hospitals, airports and factories are performance spaces, too.

You're designing these spaces to help people perform better, whether they're doing open-heart surgeries or racing toward gate 58.

**We get that.**

People need to feel comfortable in a space to be at their best.

Each element, like a dot, has to be connected. That's why the floor plays a crucial role. It's the one continuous element in a space. A well-designed floor connects people to purpose, making them feel safe, comfortable and ready for what comes next.

---

**So let us help you set the stage.**

The right floor is essential. But so is the right partner. One with the right experience and expertise to handle any situation. One with a breadth of service capabilities and product offerings to help you create any stage you can imagine.

**THAT'S SHERWIN-WILLIAMS  
HIGH PERFORMANCE FLOORING.**

## High performance is in the details.

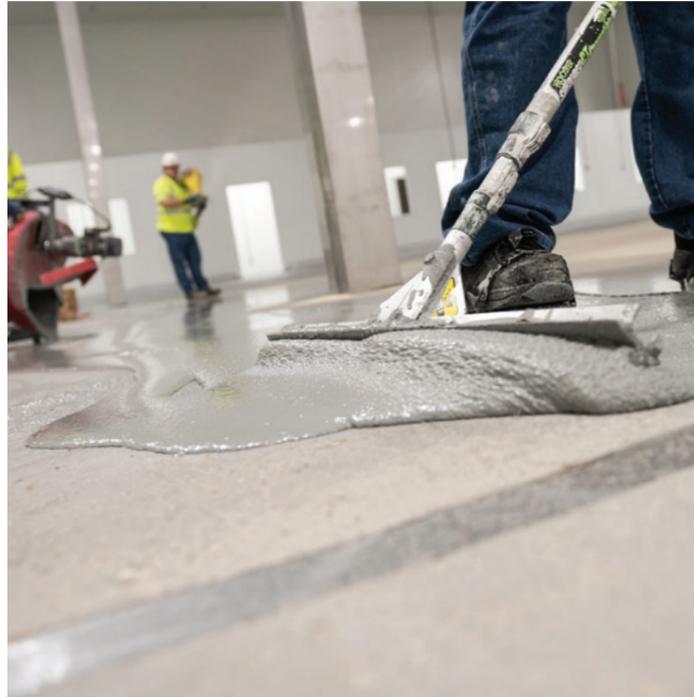

Finding the right balance of slip-resistance and ease of cleaning can be difficult to achieve. Will a coarse aggregate work best? Perhaps a fine textured coating would work better. We'll help you decide what's right for your environment.

We'll also help you find a specialist installer. One with the skills and experience to bring your design to life.

We'll even teach you how to design for sustainability via our accredited courses. So you can gain more confidence in your specifications - and pick up CPD credits along the way.

**Let our expert flooring professionals guide you from specification to application to future maintenance and beyond.**

### SPECIALIST INSTALLERS ARE A CALL AWAY.

### PERFORMANCE TAKES PRACTICE.

It's the action that happens behind the scenes that makes the performance shine. Getting the spec right. Smooth installation. Figuring out the right cleaning and maintenance program.

So many variables, from aesthetics to durability. Each consideration requires careful planning. A wrong choice could mean early repairs or a costly replacement - instead of years of uninterrupted service. That's why it's so important to collaborate with a company that's done it all.

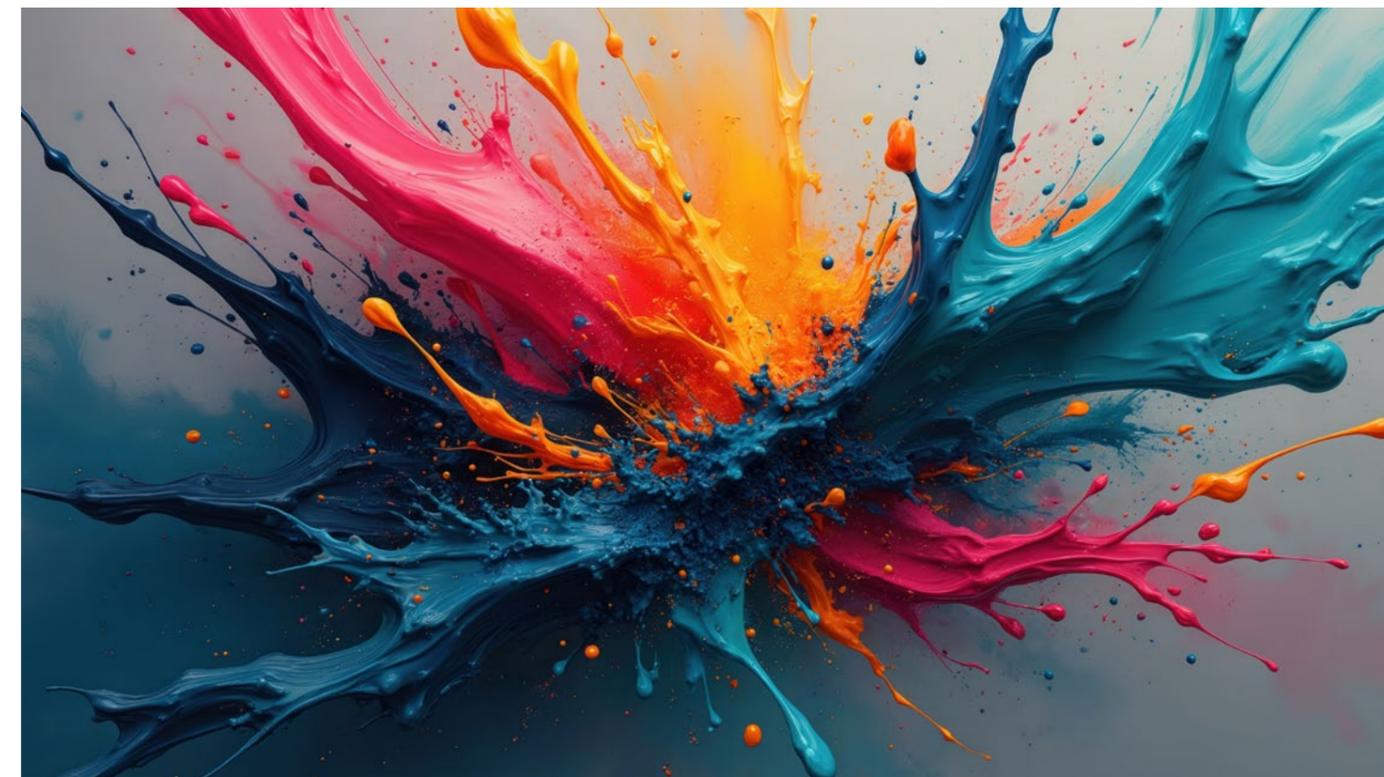

## Every floor starts as a blank canvas.

It's up to you to make it shine. And that starts with getting colour and design right.

Looking for a specific grey? We'll help you find the exact match from RAL or BS shades. We can even duplicate the most difficult red in a corporate logo, precisely dialing in the tint with customisable colour matching for any design. And we won't stop trying until you approve the latest samples.

Plus, you can choose from an array of aggregates and fillers for unique design and colour combinations for any of our decorative systems.

**Your colour and design choices are literally unlimited with Sherwin-Williams High Performance Flooring.**

## Make sure sustainability is more than an encore.

### Design it right into your space.

Natural ingredients. Water-based chemistries.  
Minimal to no volatile organic compounds (VOCs).  
Long-lasting durability.

The right flooring options can help protect the environment and the world around us. You just need to find them.

We'll help, with sustainable flooring solutions that deliver long-term performance without using harsh materials. Like water-based formulations with the same or better performance than solvent-based options - and no VOCs.

Naturally, you'll want credit for being sustainable. LEED or BREEAM credit, that is. And we'll help you get there with products that have full life cycle assessments and Environmental Product Declarations that are third party verified. So you can design with sustainability in mind - and reap the rewards, too.

From airports to sports arenas to factories, we help you get the floor right - no matter how demanding the application.

**AIRPORTS**

Durable floors that withstand heavy daily traffic and frequent cleaning

**ANIMAL CARE FACILITIES**

Abrasion-resistant floors that endure harsh cleaning and enhance safety

**AUTOMOTIVE SHOWROOMS AND AIRPLANE HANGARS**

Diverse flooring solutions that deliver aesthetics and performance

**MOISTURE MITIGATION APPLICATIONS**

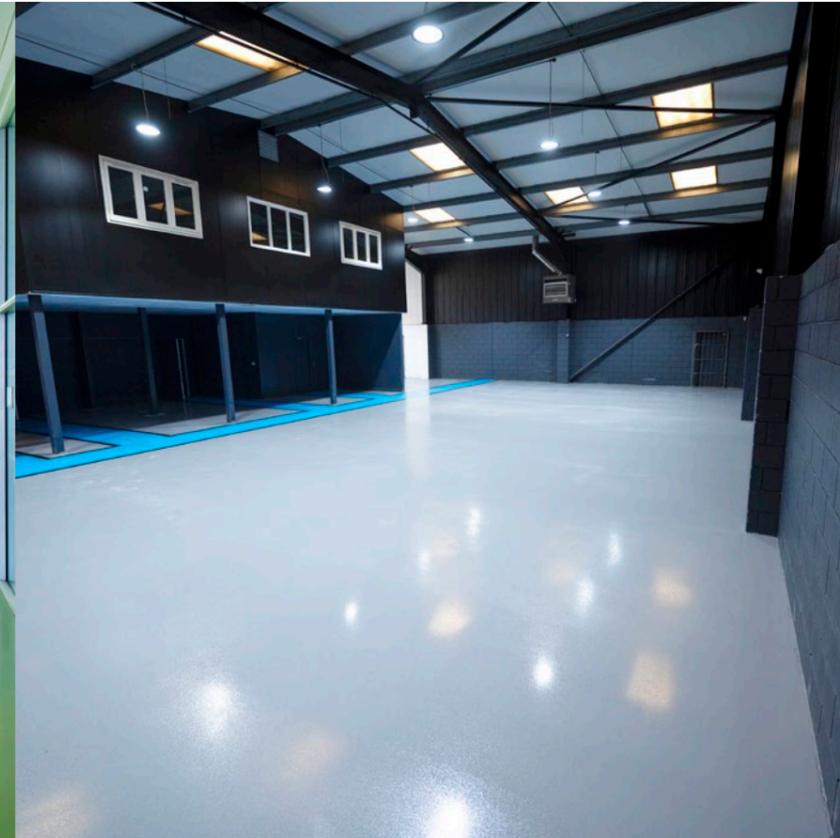

Flooring systems that control moisture and enable earlier installations on green concrete

**SCHOOLS AND UNIVERSITIES**

Decorative and conventional floors offering both form and function

**FOOD AND BEVERAGE FACILITIES**

Floors designed to maintain clean, safe and compliant environments

**CONVENTION CENTRES AND HOTELS**

Seamless floors with unlimited design and colour options

**DATA CENTRES**

Floors that help reduce static electricity to protect electronics

**HEALTHCARE FACILITIES**

Sterile floors promoting hygiene in diverse healthcare environments

**MANUFACTURING**

Durable floors with the abrasion and impact resistance to handle heavy equipment

**STADIUMS AND ARENAS**

Lasting floors with stunning aesthetics

## DECORATIVE FLOORING SYSTEMS

Timeless beauty with superior protection.

A full palette of design options, from flakes, to quartz and multiple solid colours. Unlimited colour choices. The tools you need to create customized designs. And all of it with materials that are tough enough to resist chemicals, stains, moisture and anything else a space can throw at it.

From flakes and quartz to decorative mosaics, you can turn your floors into works of fine art. And they'll look great over the long haul so you can minimize maintenance needs and future costs.

### DECO QUARTZ

Achieve a unique style and distinctive fine granule appearance with a customized blend of coloured quartz and clear resin.

### DECO FLAKE

Focus on aesthetics while watching your bottom line with embedded multicoloured vinyl chips offering an alternative to solid colour floor coatings.

### SOFTOP™

Deliver ergonomic comfort and noise reduction compared to other traditional hard-surface floor systems - with beauty, too.

Sherwin-Williams has the best product reps in the business. Whether it's a question of specifications or colour samples, they are always extremely helpful."

ASSOCIATE ARCHITECT

## INDUSTRIAL FLOORING SYSTEMS

Designed and engineered for ultimate protection.

High abrasion, harsh chemicals, thermal shock, extreme temperature changes - bring it on.

Food service operations? No problem. We have floors that handle a constant barrage of oils and grease and withstand the harshest cleaning processes. Warehouses where heavy equipment threatens a floor's integrity? Check. The most aggressive environment you've ever designed for? We've got it covered.

Choose from a wide range of flooring systems for virtually any industrial application - from warehouses to parking decks to manufacturing operations. Get the performance you demand, and say goodbye to downtime.

These floors provide safety benefits like a good, highly-gripped surface, and they're easy to clean and maintain. They also look great and last for years."

SENIOR PROJECT ENGINEER

### RESUFLOR™ TOPSEAL

Breathable systems that control moisture and can be applied to green concrete - in a revolutionary water-based system.

### RESUFLOR™ TOPCOAT

Achieve excellent gloss retention, good UV colour stability, and chemical and stain resistance with 0.5mm light-reflective finish.

### RESUFLOR™ TOPFLOOR SL

Provide superior protection with high gloss smooth or textured finishes for medium and heavy duty areas.

### RESUFLOR™ INDUSTRY

Gain added strength with heavy duty epoxy screed systems that are harder and more durable than concrete whilst holding up to heavy loads, busy traffic and general abuse.

### FASTOP® MULTI

Deliver tough and durable installations in challenging environments where hygiene and cleanability is a priority.

### ACCELERATE™

Fast curing, low odour systems with full UV stability for time is important and environments are sensitive.

### ACRYDUR™

Ultra fast cure systems with solid colour or decorative options for areas where quick turnaround is paramount.

### RESUTILE™

Innovative systems that provide ultra high gloss that stays glossy for longer as well as textured and ESD variations.

## WALL AND CEILING SYSTEMS

Seamless. Integrated. Cleanable. From top to bottom.

Cleanability is critical in many coating applications. For preventing the contamination of food or pharmaceutical products in processing facilities. Or lowering risks related to hospital-acquired infections.

That's true for more than floors. Walls and ceilings count, too. So you need to create seamless, integrated wall and floor systems in these environments. Then, you'll enhance cleanability and safety for consumers, workers and the environment.

Featuring smooth and continuous films, the system ensures facilities can properly clean and disinfect all surfaces - from the ceiling to the floor. Resuwall also helps reduce water and chemical usage.

### RESUWALL™

Create a multilayer, water-based, high-build wall and ceiling surface using an epoxy base coat and a water-based polyurethane finish coat.

# Flooring solutions designed to perform

## FASTOP®

### Hygienic Polyurethane Cement

The FasTop range from Sherwin-Williams delivers robust and versatile polyurethane cement flooring solutions. Certified by M1, Eurofins, Campden BRI and HACCP, these non-taint systems offer exceptional chemical resistance, customisable slip resistance, and resilience to thermal shock and cycling.

Designed for demanding environments such as food and beverage and heavy manufacturing facilities.

## RESUFLOR™

### Epoxy

Sherwin-Williams epoxy floor coatings are renowned for their durability, resilience and visual appeal. They provide excellent protection against impact, chemical spills and mechanical wear.

Resuflor combines strength and style, making it well suited to many industries that require both performance and aesthetics.

## SOFTOP™

### Flexible Polyurethane

SofTop polyurethane systems are engineered for flexibility and durability. Their elasticity accommodates substrate movement and thermal expansion, helping to prevent cracking.

SofTop Comfort systems can also be provided where impact sound and enhanced comfort are a priority. SofTop offers a balance of long-term performance and refined aesthetics.

## RESUTILE™

### High-Performance Chemical Resistance

Resutile coatings provide outstanding chemical resistance, full UV stability, and very high abrasion resistance. These qualities make them ideal for high-tech environments such as cleanrooms, laboratories, pharmaceutical facilities, and chemical processing plants, where both durability and electrostatic dissipation are often required together.

## ACCELERERA™

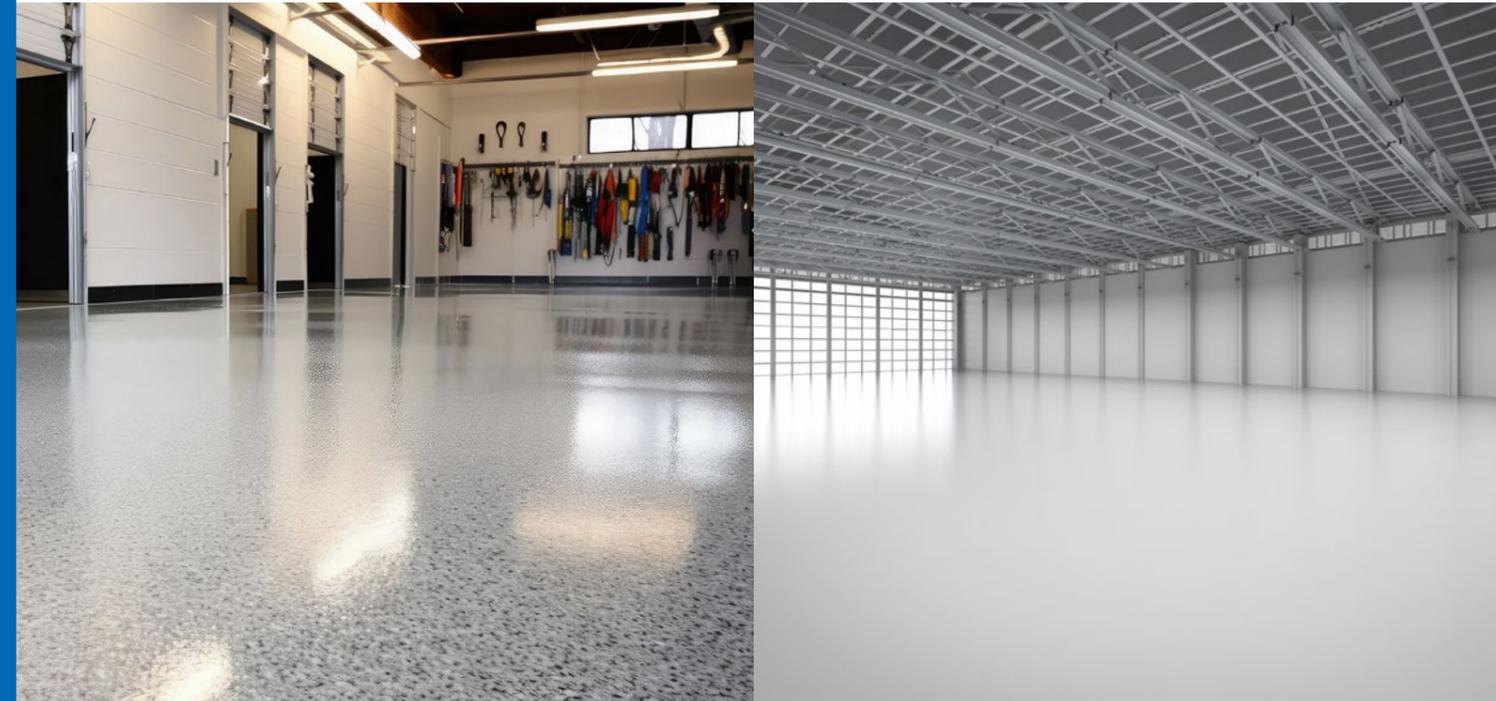

### Fast Cure Polyaspartic

Accelerera polyaspartic coatings are designed for environments that demand fast installation without strong odour or compromising durability. Known for their rapid cure times, these coatings resist yellowing and maintain their appearance under UV exposure. Accelerera offers a comprehensive solution that combines speed, strength, and visual appeal.

## ACRYDUR™

### Ultra Fast Cure MMA

Acrydur MMA acrylic coatings are well-suited for fast-paced environments. With ultra fast cure times and excellent resistance to wear, chemicals, and mechanical stress, these coatings are ideal for areas with heavy traffic and frequent spills. Acrydur delivers a durable, efficient, and attractive flooring solution.

## SHER-CRETE™

### Cementitious Screed Systems

Sher-Crete is a self-levelling cementitious screed suitable for both refurbishment and new build projects. Applied by hand or pump, it repairs and raises existing substrates to create a smooth, level surface ready for your new flooring system. With fast installation and curing, Sher-Crete helps meet tight project deadlines.

## THE SHERWIN-WILLIAMS DIFFERENCE

Sherwin-Williams High Performance Flooring delivers unique, sustainable flooring solutions to help your facilities maintain the highest level of performance from the ground up. Our extensive portfolio of flooring, structural steel and passive fire protection coatings for high-value infrastructure helps customers protect lives, enhance safety, safeguard assets and create a lasting aesthetic legacy. From sports arenas to convention centers, airports and healthcare facilities, Sherwin-Williams brings exceptional industry, product and technical expertise to ensure successful project outcomes.

Unparalleled  
distribution network

Global  
industry expertise

Most extensive sales  
organization coverage

Unmatched technical  
and specification service
