

## Polishing Concrete Floors

### AIA/CES Registered Provider Program Summary

<b>Provider</b>	Sherwin-Williams Company K065
<b>Program Number</b>	Polish20
<b>Program Title</b>	Polishing Concrete Floors
<b>Dates and Locations</b>	(Ongoing) Varied - General Area or Multiple Locations in United States
<b>Credit Info</b>	<b>1.0000</b> LU Hours This program <b>has</b> HSW credit
<b>Description</b>	Looking for an environmentally responsible flooring solution that also looks beautiful? Polished concrete is gaining in popularity with architects and designers, due to its sustainable qualities, reduced total cost of ownership, and long-lasting beauty. This course provides an introduction to the polished concrete installation process and provides an overview of concrete densification technologies.
<b>Learning Objectives</b>	<p>Learning Objective 1: Understand the advantages of incorporating polished concrete in your residential and commercial projects, and which design options are available for new and existing concrete slabs.</p> <p>Learning Objective 2: Explain the steps in the polished concrete installation process, including pre-installation action items that contribute to a successful outcome</p> <p>Learning Objective 3: Learn about the concrete densification process, so that you are able to determine which system is the best match for the condition of the slab.</p> <p>Learning Objective 4: Learn about advancements in concrete densifying product technologies and understand the impact of amorphous colloidal silica densifiers on installers, the floor and the environment.</p>
<b>Formats Given</b>	Seminar
<b>Cost</b>	Free
<b>Content Level</b>	General
<b>Topics Covered</b>	Performance Technology
