

SHERWIN-WILLIAMS.

AIRCRAFT COLOR  
VISUALIZER

## COLOR EXPLORATION AT YOUR FINGERTIPS

Imagination transforms into actualization with the new Aircraft Color Visualizer from Sherwin-Williams Aerospace Coatings. This web-based tool allows plane owners, paint shops, aircraft designers, original equipment manufacturers and aerospace enthusiasts to envision aircraft color combinations easily in a fully interactive experience.

### HOW IT WORKS:

1. Visit [acv.sherwin.com](http://acv.sherwin.com) on your desktop\*
2. Select an aircraft model to customize
3. Choose a base color and up to three accent colors in solid or metallic finishes
4. Virtually spin the aircraft to view your creation
5. Save, print or share your final scheme

### FEATURES:

- Six aircraft models ready to customize – ranging from a kit plane to a heavy jet
- Full access to the hundreds of colors available in the Sherwin-Williams aircraft color library
- Metallic and accent alternatives for every color
- Interactive model can be viewed from any angle
- Professional design support referrals are available on demand

### BENEFITS:

- Users can see color combinations on different aircraft types from a variety of angles
- Owners and designers save time and resources by exploring color options earlier in the design process
- Expansive possibilities within color and design lead to truly one-of-a-kind aircrafts
- From the airplane novice to the seasoned design professional, users can easily navigate the capabilities of the site

\*Due to sophisticated graphics, the Aircraft Color Visualizer cannot be used on mobile devices at this time. Users can access the tool's full capabilities on their desktop.

*Note: Computer screens and printers may vary in how colors are displayed, therefore the colors you see may not match the coating's actual color.*
