

FLUROPON® CONTINUUM™ COLORS

INTRODUCING FLUROPON® CONTINUUM™

BRILLIANT COLOR. TWO COATS. NO COMPROMISE.

GET TO KNOW OUR REVOLUTIONARY TWO-COAT 70% PVDF METAL COATING SYSTEM FOR COIL AND EXTRUSION APPLICATIONS.

What do you get with applied science and decades of weathering data? A two-coat system that performs just as well as three coats. Chemists at Sherwin-Williams have worked for years to perfect our proprietary two-coat mica-based system—and now we've taken metalescent coatings to a whole new level.

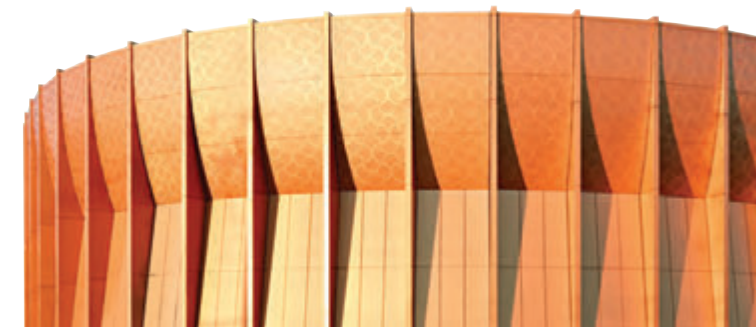

We've formulated Fluropon Continuum with the optimal combination of raw materials. This eliminates the need for a clear coat and opens you up to nearly limitless color options.

Our system has expanded beyond the traditional silvers, golds and champagnes into color spaces that have never been achieved in previous mica/metallic systems. Bright, vibrant reds, greens and blues are all on the table.

Depth and dimension? Look no further. When light hits mica particles, some light is reflected out and some is absorbed in. This creates a richness of color that will turn heads for years to come.

Accept no compromise. See your vision come to life with Fluropon Continuum.

Order samples at coil.sherwin.com/continuum.

FLUROPON® CONTINUUM™

70% PVDF ARCHITECTURAL
METAL COATINGS

FLUROPON® CONTINUUM™ APPLICATIONS

All Fluropon® products are applied in-factory by approved coil coaters and extrusion applicators. For more information on approved applicators and Fluropon end-use applications, contact your local Sherwin-Williams Coil Coatings representative or visit coil.sherwin.com.

Coil Applications (Pre-Paint) Extrusion Applications (Post-Paint)

- Metal wall panels
- Metal roofing
- Soffits
- Fascia
- Curtain wall
- Window and door frames
- Post-painted panels
- Louvers and sunshades
